

Fig. 1 shows, inter alia, a generic device.

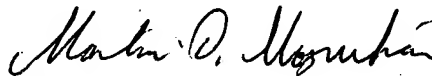

Fig. 2 shows various addons/variations of this generic device.

Figs. 3-5 show a method of implanting the device of Fig. 1 (as noted, for example, in the brief description of drawings section and in paragraph 0013 of the publication). A specific feature, a long controller wire (170) is shown in Figs. 4-5, but as stated in the description, Figs. 3-5 describe a generic process.

In summary, applicant feels that none of the figures show a specific species as suggested by the Examiner.

Applicants reserve the right to file, at a later date, additional divisional applications claiming priority from the present application which are directed to the non-elected Species.

Respectfully submitted,

Martin D. Moynihan
